DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Watkins, U.S. 3,993,129.

Regarding claims 1 and 5, Watkins discloses an inlet port (56) in fluid communication with the shoulders of a conically-shaped piston (62), a horizontal discharge port (54) in fluid communication with the point of said conically-shaped piston through a vertical discharge channel (52), wherein the point of said conically-shaped piston is held in physical contact with and closes said discharge channel by tensioning means (66), wherein said tensioning means may be adjusted (via 70) to vary the pressure exerted by said tensioning means (66) on said conically-shaped piston (62).

Allowable Subject Matter

Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 3672

The prior art of record does not disclose or suggest all the claimed subject matter including a check valve within the inlet port.

The prior art of record does not disclose or suggest all the claimed subject matter including the tension on the spring may be adjusted by moving an adjustment screw.
